

Distance Learning Schools Have Connections

to other schools in our region and to learning opportunities around the world!

A Distance Learning Room has a fiber optic broadband connection that links to a network of more than 40 other schools in our region that have interactive TV classrooms.

The DL logo is at the top in red and white. Below it, the tagline 'The Power To Transport' is written in white. In the center, three diverse students (two women and one man) are shown from the waist up, holding books and looking towards the camera. The background is black with a white glow around the students.

Advanced Courses
Advanced Technology
Extraordinary Opportunity

See your guidance counselor for details.

**Learn with students at other schools...
and be here in time for your next class.**

- Expand your horizons with a much greater selection of course offerings.
- Advanced Placement and college credit courses can strengthen your academic profile and save you tuition.

...Tuition savings for just one course could equal up to three months of working weekends!
- Experience cutting-edge technology in a hands-on environment.
- Interact with students and teachers from other schools and communities in a setting that helps prepare you for advanced educational and real-world situations.
- Meet new students with common concerns and different perspectives.

Much more information is available on the full range of courses, professional development opportunities & continuing education offered through distance learning.
